

The Critical Path

"The success of all humanity can be accomplished only by a terrestrially comprehensive technologically competent, design revolution.

This revolution must develop artifacts whose energy-use efficiency not only occasions the artifacts' spontaneous adoption by humanity, but therewith also occasions the inadvertent, unregretted abandonment and permanent obsolescence of socially and economically undesirable viewpoints, customs, and practices."

- R. Buckminster Fuller, Critical Path, pg. 199

Biopiracy

THE PLUNDER OF NATURE AND KNOWLEDGE

"*Biopiracy* is a path-breaking work on one of the most important issues of the coming century... Vandana Shiva's inspiring book is a clarion call... [that] should be widely read and discussed by everyone concerned with the fate of the Earth."

—Jeremy Rifkin, author of
The End of Work: The Decline of the Global Labor Force and the Dawn of the Post-Market Era
